

Enclosures

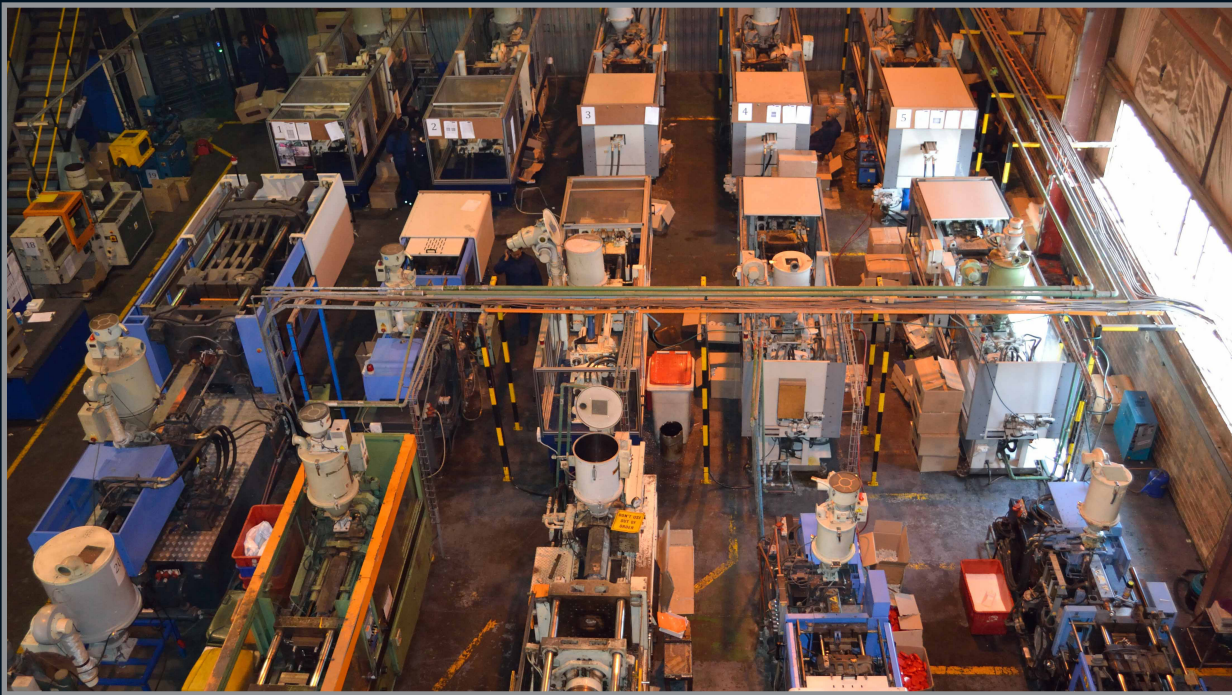

One of our core competencies is the design and manufacture of non-metallic electric enclosures. Various materials are used depending on environment and application.

The two main families of materials can be separated into:

- Plastics - Injection Moulded
- Glass Reinforced Polyester (GRP) - Compression Moulded

Plastics

18 Injection moulding machines up to 400T.

Locks

Handles

Accessories

Rotary Operating
Handles

GRP - Compression moulding 80 machines up to 800T.

Insulators
